

SDA THEORY ASSIGNMENT

NAME: FAHAD AHMED SHAH

REG NO: SP23-BSE-063

USE CASE ,SSD AND FULLY DRESSED FOR CREATE FEEDBACK FORM

1. USECASE:

SDA THEORY ASSIGNMENT

2. FULLY DRESSED:

Use Case Name	Create Feedback Form
Description	This use case describes the process by which an admin or form creator designs and saves a feedback form using the system's form builder interface. The form will be used to collect user input such as comments, ratings, or suggestions.
Primary Actor	Admin / Form Creator
Trigger	The admin chooses the "Create New Feedback Form" option from the dashboard or settings menu.
<u>Preconditions</u>	- Admin is authenticated and logged into the system. - Admin has permission to manage forms.
Postconditions	- The feedback form template is saved and available for user interaction.
Main Success Scenario	1. Admin selects "Create Feedback Form". 2. System displays a form builder interface. 3. Admin adds required fields (e.g., name, email, feedback message). 4. <u>Admin</u> configures <u>validation rules</u> (<u>optional</u>). 5. Admin submits the form design. 6. System validates the form structure. 7. System saves the form template to the database. 8. <u>System displays a success</u> confirmation message.
Extensions (Alternate Flows)	3a. Invalid Field Configuration: → 3a1. System highlights issues and requests correction. 6a. Validation Fails: → 6a1. System shows error and prompts correction.
Frequency of Use	Occasional (e.g., when a new type of feedback is needed)
